

COVID Update relative to 2021 Massey Exposition of North America (MENA).

Just to let everyone know, there is very little, if any chance of the 2021 MENA getting canceled due to the COVID plandemic. Vanderburgh County is Code Blue, which is the safest level. Show officials have talked with the head of the local health department, and a plan is being put in place included recommended number and availability of hand wash stations, etc. Appropriate steps for everyone's safety are being put into place.

Hand sanitizer will be available throughout the Massey Feature tent, and in every other building on the site. Masks will not be required, but if you feel more comfortable wearing one, that is your prerogative.

We are good to go and have a great show! It's time we all got together to enjoy a tractor show and visiting with folks we likely haven't seen in over a year.

Hopefully you have already sent in your Saturday night banquet reservations. If not, there is still time. I needed an early number by middle of May for the caterer, but they have now given me until May 31<sup>st</sup> for a final number. So, if you missed getting your reservation in the mail by May 7<sup>th</sup>, don't lament, but please get it sent in soon.

Look forward to seeing you there!

JB
